# **Rural Cellular Corporation E911 Implementation Report May 2nd, 2005**

## **Summary**

Rural Cellular Corporation ("Rural Cellular") operates wireless networks in rural communities in 14 states covering approximately 5.9 million people. RCC's service area encompasses 34 rural service areas (RSAs), 3 metropolitan statistical areas (MSAs) and a few partitioned basic trading areas (BTAs). The Rural Cellular networks utilize predominately TDMA/analog technology. Rural Cellular has begun to deploy some GSM and CDMA overlays in several markets.

### **Phase I**

Rural Cellular has made progress in the deployment of Phase I location capability services. For details on these deployments, please refer to the spreadsheet set forth in the Appendix to this report.

### **Phase II**

Rural Cellular has also made progress in delivering Phase II services to public safety answering points. Rural Cellular continues to have concerns about the performance of network-based solutions in rural markets. Rural Cellular has elected a handset-based solution for all of its CDMA markets.

In addition to the network-based solution provided by Grayson Wireless, Rural Cellular also has been deploying in certain TDMA and GSM networks an alternative network-based solution provided by Polaris Wireless.
